Experience

MARCH 2023 – JANUARY 2024
Associate Software Engineer | Vizient, Inc. | Remote, United States

- Collaborated with multiple teams on feature implementation throughout our 2-week sprints. Drove the implementation through pair programming around 50% of the time and provided concise documentation through Confluence.
- Assisted in migrating Java 8 to Java 11 & MSSQL 2016 to MSSQL 2022, which consisted of a refactorization and cleanup of the existing codebase. This helped increase application performance by 30% and reduced existing production issues by 50%.
- Implemented a Health Check system in Python across two teams to monitor resource utilization and availability to quickly identify and triage an issue progressively. This led to a decrease in the application downtime by 25%.
- Provided around-the-clock Production Support to 2 teams through OpsGenie/Remedy Force tickets and helped remediate issues promptly ensuring client impact was low.

MARCH 2019 – JANUARY 2021
Lead Coding Instructor | Code Ninjas | Floral Park, New York

- Introduced the ideas of Software Engineering, Data Structures, and Algorithms to children and teens ages 7 – 14, through game and web development using high-level languages such as Java, JavaScript, Python, and C#.
- Mentored students and co-workers on the importance of phases and the SDLC, which led to a 50% increase in efficiency among student applications.
- Curated personalized lesson plans for individuals and groups to keep a high engagement ratio and boost program sales by 25%.
- Created documentation on all lessons and applications to help onboard new staff and students to provide a seamless transition to the program.
